

letter from Crisp suggesting a suit and finally our initial Chairman resigned. We hope those who left come back. The cause of fear and suits is gone.

Our whole city is afraid of law suits, the legal scheme and lawyers. Our rights of free speech are curtailed even when suits are dismissed because everyone realizes so much is spent on defending these suits in court. It's all part of the legal scheme in New Hampshire where frivolous law suits by lawyers are common and the lawyers are not punished by the judges because they all belong to the same illegal monopoly--The New Hampshire Bar Association.

After a few years in Concord, we will see Jack in black on the bench as a State or Federal Judge; the final resting place for those politically connected in New Hampshire politics. This is particularly why New Hampshire Courts are so unjust; it's all a matter of politics of appointments which includes the Attorney General and his Staff...it's not what you know (quality); it's who you support (politics). It's not what New Hampshire was all about.

Why was Crisp's resignation kept secret for one month...much is secret in our local government. Only the City Manager is quoted with kind words and we will eventually know why, because like all human waste, it eventually comes to the surface.

If one more dime is given to Crisp by the City, we should court marshal those who retained him and have a public flogging on Green Square.

I agree with a recent editorial "the final chapter on his tenure as city attorney has yet to be written" and that chapter will surely cost Berlin money!

Very truly yours,

RICHARD P. BOSA

P.S.: He truly should be President of the New Hampshire Bar because he is its perfect symbol of greed, greed and more greed...good riddance.
